

HEPA Filter Panels & Cartridges

Overview

- HEPA filters are made from water resistant, Fire retardant micro fine glass fibre media in Panel Shape or Cartridge shape.
- These filters being highly efficient filters are mainly used in Healthcare industries, Pharmaceutical industries, Food and Beverages industries, Electronics and Semiconductor industries.

Features & Benefits

- Robust construction to withstand harsh environmental conditions.
- Environment friendly & 100% leak proof construction.
- Enough filter media provided to ensure very low initial pressure drop.

Application

- Pharmaceutical Industries
- Chemical Industries
- Hospitals & Shopping Malls
- Automotive Industries
- Food Industries
- Dairy & beverages Industries

Specification

- Filter Media : Water resistant, Fire retardant, Microglass fiber media
- Separator : Aluminium Separator
- Size : Customised
- Grade : F7, F9, F10, H13, H14
- Micron Rating : 0.3 micron 97 %, 99.7 %, 99.97% , 99.997%
- Frame MOC : GI, Aluminium, SS 304, SS 316 & Customise
- End connection : Flange, Box type
- Media Edge sealing : End sealing by gluing media and frame.
- Adhesive : PU Compound, High temp. Epoxy Adhesive
